2007	"	"	"	"	"	"	"	"	"	"	"	"	"

E. **Purpose of Use** - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation 2 1/2 ACRES acres; Stockwatering ; Domestic LOWA HAWKS, CANTINAS
Other (specify)

Parcel Number(s) of Place of Use: 084-140-06

F. **Changes in Method of Diversion** - Describe any changes in your project since your previous statement was filed.
(New pump, enlarged diversion dam, location of diversion, etc.)
NONE

G. Please answer only those questions below which are applicable to your project.

1. Conservation of water

- a. Are you now employing water conservation efforts? YES ☒ NO ☐
Describe any water conservation efforts you have initiated: USING NATURAL PLANTS FOR LANDSCAPING
ALL DIVERTED WATER NOT USED IS RETURNED TO CREEK THEN TO LAKE SHASTA.
- b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:

Reduction in Diversions:

Year (AF/MG) Year (AF/MG) Year (AF/MG)

Reduction in consumptive use:
Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES _____ NO _____

2. Water quality and wastewater reclamation

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES _____ NO X
- b. If you are claiming credit due to the substitution of reclaimed water, desalinated water or polluted water in lieu of a claimed pre-1914 appropriative right under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of substitute water supply used:

Amount of reduced diversion:
Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

State the type of substitute water supply: _____

Amount of substitute water supply used:
Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to the use of a substitute water supply. YES _____ NO _____

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES _____ NO X
- b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used:
Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)
I have data to support the above surface water use reductions due to the use of groundwater. YES _____ NO _____

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA
There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California, riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on their riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available, including the following:

“Statements of Water Diversion and Use”
 “Information Pertaining to Water Rights in California”

RE: FILE NO 322:LKF:^S11364

Dear Sir,

I have recently purchased a parcel of property in Shasta County. This property has been receiving its domestic water supply via a live stream diversion since 1964.

The appraiser for the lender in this purchase transaction was unsure of the ramifications of Riparian Rights on the water passing over the property. In the appraisal report he made mention of the need for a "legal" source of water, either a domestic well or documentation of the ability to take now, and in the future, surface water from the live stream diversion.

Currently, there are no other users from this live stream, which originates from the property above mine. There has been sufficient flow to accommodate several domestic users, even through these last few drought years.

In speaking to your Assistant Julie Laudon this date at your office, she proposed that I write this letter requesting that the pertinent information on the Riparian Rights be sent to the lender, Central Pacific Mortgage, Attn: Garnett, 4512 Feather River Drive, Stockton, California 95219.

I found it refreshing to have all my questions answered fully and professionally this morning.

Sincerely,

JUNE 8 1993

Central Pacific Mortgage
Attention: Garnett
4512 Feather River Drive
Stockton, CA 95219

Dear Garnett:

I am writing at the request of Mr. Tom R. Hoover to assist him in documenting the water rights attached to his property in Shasta County. I understand that Mr. Hoover is seeking funding and needs to document for the lender his right to take and use surface water from the stream crossing the property.

Records of the Division of Water Rights (Division) show that the previous owner, John J. Humphrey, filed Statement of Water Diversion and Use Number 11364 on February 16, 1984. Statement 11364 claims a riparian right to divert 10,080 gallons per day on a year round basis for domestic use on the property. The source of water is listed as an unnamed stream tributary to Shasta Lake.

In the Division's files, Statement 11364 is still listed in Mr. Humphrey's name. I spoke to Mr. Humphrey on May 28, 1993. He said that he had sent a letter to the Division assigning the water rights to Mr. Hoover, however, the letter was lost within the Division. Mr. Humphrey said that he would send another letter of assignment. Once the letter is received, Statement 11364 will be assigned to Mr. Hoover.

The water rights attached to the property in question are based on the laws of riparian water rights. According to these laws a land owner who's parcel abuts a stream or is crossed by a stream has the right to divert and use the natural flow of the stream on his parcel. The amount that may be diverted is limited to the amount that can be reasonably and beneficially used on the parcel. No permit is required for such use, and the riparian right is neither created by use nor lost by nonuse.

In California, jurisdiction over riparian water rights is held by the courts, however, most riparian rights are exercised without the court's validation. In cases before the State Water Resources Control Board (State Water Board), riparian water right claims are regarded as valid if the criteria defining a riparian right are met by the claimant. Enclosed is the booklet Information Pertaining to Water Rights in California in which a complete discussion of riparian water rights can be found.
